

## Sheffield's Stainless Solution - Sheffield College Catering Waste Composting Using Rocket In Vessel Composter

College, part of The Sheffield College, have chosen to pilot small scale in-vessel composting to treat the food waste generated there.

The first Rocket composter to be installed in Sheffield is planned as the first step in the composting feasibility trials.

The system is hoped to be eventually rolled out to the other College sites. The end product being planned for use in horticultural sciences and land based studies.
